Tomorrow I will be in the office working on CZARA stuff. Any time works for me. How about 7:30 am?

Jenny,

I made this request to see if we could get the specific spray records for this area and cross reference the records with the spray sites and type N streams.

Alan

More from ODF. I still think it may be best for you to request the actual application records from ODF. They have 2009-2011 records.

Hi, Curtis.

ODF considers the information provided by ODF to be public record, and so has no concerns about sharing it with the EPA.

Dale and Brad,

We've been requested by EPA to share GIS shapefiles that we created from the HWY 36 pesticide application records. I intend to share as requested; please let me know asap if you have concerns. Thanks.

Julie and Curtis,

Alan Henning with EPA's Region 10 office stationed in Eugene has asked me for GIS shape files for 2010 and 2011 pesticide application locations and for application records for the same years. Can I give them to him? Who has to sign off on that?
